## When we work together, anything is possible!

## Protect yourself, your family, friends, colleagues and our community by getting vaccinated today. The COVID-19 vaccines are safe, effective and getting yours can help us all get back to normal faster!

**357+ million doses** of COVID-19 vaccine have been given in the United States from December 14, 2020, through August 16, 2021.

**COVID-19 vaccines are safe and effective.** COVID-19 vaccines were evaluated in **tens of thousands of participants** in clinical trials.

**COVID-19 vaccines are not experimental.** They went through all the required stages of clinical trials.

The vaccines met the Food and Drug Administration's (FDA) rigorous scientific standards for safety, effectiveness, and manufacturing quality needed to support emergency use authorization (EUA).

COVID-19 vaccines help **keep you from getting seriously ill** even if you do get COVID-19.

Getting vaccinated yourself may also **protect people around you**, particularly people at increased risk for severe illness from COVID-19.

**None of the COVID-19 vaccines contain the live virus that causes COVID-19** so a COVID-19 vaccine cannot make you sick with COVID-19.

Get vaccinated regardless of whether you already had COVID-19. Evidence is emerging that people get better protection by being fully vaccinated compared with having had COVID-19. One study showed that unvaccinated people who already had COVID-19 are more than 2 times as likely than fully vaccinated people to get COVID-19 again.

## To get your COVID-19 vaccine, visit vaccines.gov to schedule an appointment.
